

# Adding a Friend on Messenger Kids

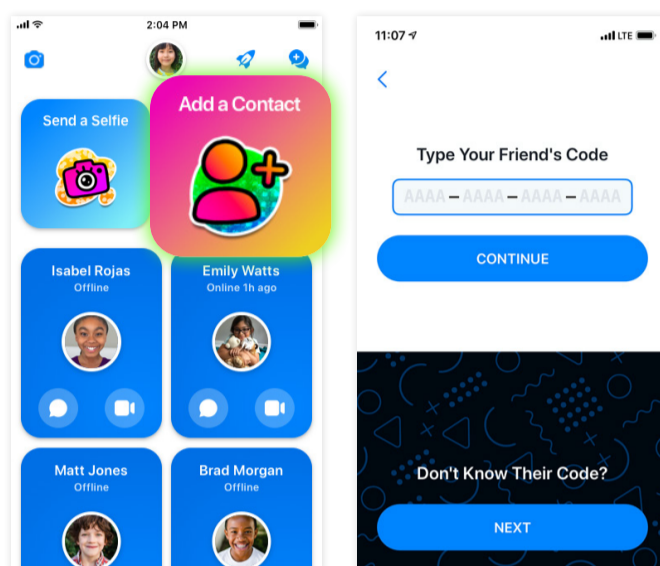

You can add contacts from the Parent Dashboard in your Facebook app or from your child's Messenger Kids app.

## From the Parent Dashboard on Facebook

- Open the Messenger Kids bookmark in your Facebook app by tapping ☰. If you don't see it in your menu, tap "See More..."
- Select your child's account, then go to the Contacts tab to choose people to add.
- If you can't find one of your child's friends, you can invite their parents to download the app.

## From Your Child's Messenger Kids App

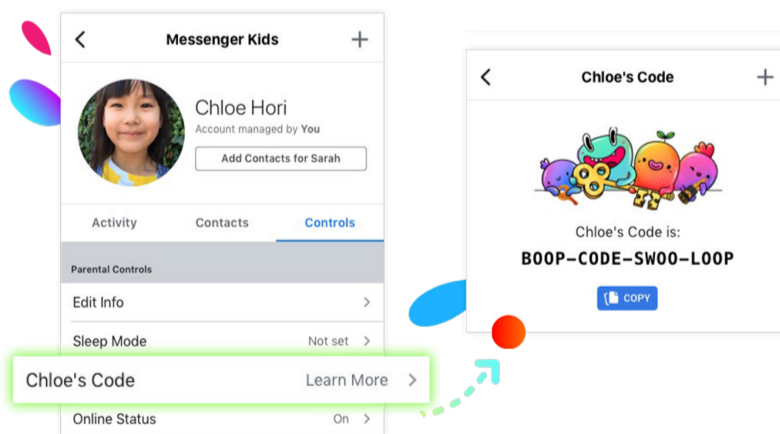

- Open your child's Messenger Kids app.
- Tap "Add a Friend" in the top section. If you don't see it, swipe to the left to reveal the remaining tiles.
- Enter the [friend's code](#), then tap continue.
- Once your child requests to add a friend, you will have to confirm them from the Parent Dashboard in your Facebook app.

## How to use codes to connect your child with their friends

### You enable codes from the Parent Dashboard

This allows your child to use a randomized four-word code to connect with their friends.

- Open the Messenger Kids bookmark in your Facebook app by tapping ☰. If you don't see it in your menu, tap "See More..."
- Select your child's account, then go to the Controls tab to set a code.
- Once you set a code, your child can use it to easily connect with their friends and family.

### Your child sees their code in Messenger Kids

- Open the app and tap your child's photo.
- Look for the code under their profile picture.
- If you don't see a code here, you must enable it from the Parent Dashboard.
